AUSTRALIAN
MADE AND OWNED

welcome home

ECOGARAGEDOORS continue to remain an Australian and family owned garage door manufacturer selling direct to the public, builders and resellers across the country. Offering superior quality garage door solutions via our state-of-the-art Australian Made roll-form machinery. Every garage door is custom made to your specifications.

ECOGARAGEDOORS is pleased to introduce **MADE BY ECO** componentry with our **SwiFit® Design Studio**. ECO SwiFit® Design Studio is an industry leading initiative to support the future of design, innovation and manufacturing in Australia. Lead by our in-house engineering department and tested in-house by our R&D team, we ensure all of our released products are **SAFE, STRONG & RELIABLE**.

Buying direct from a manufacturer and using our unique purpose-built software, **ECOGARAGEDOORS** are industry leaders in lead times. It has never been easier or quicker to buy and install a new garage door!

SAFE | RELIABLE | TRUSTED

At Eco Garage Doors we reduce our environmental footprint by implementing the latest packaging methods to reduce waste and energy saving conservation via company operations and products to the consumer. We also deliberately choose suppliers who share our environmental values.

Panel Lift-Safe GARAGEDOORS

Manufactured by Eco Garage Doors
SAFE | STRONG | RELIABLE

Eco Garage Doors Panel Lift-Safe garage doors (sectional garage doors) are manufactured locally at our Melbourne facility with our Australian made, state of the art roll-forming machine. The sectional garage door is available in four styles ranging from Lincoln, Slimline, Classic and the Ultraline profile. Constructed with genuine 0.6mm gauge COLORBOND® steel made by Bluescope, the Panel Lift-Safe garage door is offered in a range of custom colours and timber look finishes to compliment the façade of any home.

Doors shown are in a woodgrain texture.

Finger protection
All our garage doors have a standard finger safe technology. Each panel is curved and interlocks to protect fingers from becoming trapped in the sections.

Powder Coat

Low and hi-cycle spring option

Smooth operation

High-wind resistant

INTERLOCKING 75MM AND 100MM SLATS, CONSTRUCTED FROM GALVANISED G300 BLUESCOPE STEEL WITH Z275 ZINC COATING AND ROLL-FORMED IN-HOUSE BY ECO.

Corrosion protection

Curtains are made of galvanised G300 steel with Z275 zinc coating. All steel components, including drum assemblies, guides and brackets, are either galvanised or zinc oxide primed.* All geared shutters have fully electroplated chains. Slats are self-draining.

* Excludes Mounting Brackets and Sprockets. ^ Axle Tube and Drum are primed black

Electric operation

An ECO HD Industrial electric opener can be fitted to any roller shutter. Openers feature travel electronic limit switches, wall-mounted control box with thermal overload sensors, oil-filled heavy duty worm drive gearbox with emergency hand chain operation in case of power failure. Motors are three-phase or single-phase to suit power supply. Optional remote controls, card readers and key switches are also available.

Wind-lock end clips and guides

Moulded nylon end clips ensure smooth, low friction operation, and can be readily replaced if damaged or worn. Standard nylon end-clips are fitted to every second slat in all shutters, except wind-locked models.

For areas subject to high wind conditions, or for very wide openings, 75mm or 100mm shutters should be fitted with malleable cast iron wind-lock end-clips and steel wind-lock guides. Wind-lock clips prevent the curtain disengaging from the guides under wind pressure.

Perforated

Slotted

Ventilation

Shutters can be pre-punched or perforated to provide ventilation for applications such as shops and car parks. Slotted slats provide 11% maximum ventilation, while perforated slats achieve 30% ventilation.

Image: Roller Shutter – Monument®

Powder coated finish

Optional powder coated factory finish with choice of 100's colours. Powder coat is more than twice the thickness of the average paint film and provides a long-wearing and durable finish.

Weather Seal

Special ECO heavy-duty rubber to seal the bottom rail against rain, leaves and dust.

Bottom rails

Heavy-duty extruded aluminium bottom rail
